GULF HIGH TEMPERATURE (HT) GREASE

Gulf High Temperature (HT) Greases are a range of clay-thickened greases recommended specifically for extremely high temperature working conditions. They contain oxidation and corrosion inhibitors and have excellent EP properties.

Gulf HT Grease is available in NLGI grades 2 and 3, and is recommended for use at temperatures from -20°C to 175°C .

Typical Properties (selected grades only)

NLGI Grade	2	3
Thickener	Clay	Clay
Texture	Smooth	Smooth
Dropping Point, $^{\circ}\text{C}$	–	–
Penetration, D 217 worked 60 x,mm/10	280	235
